

SOEN 341 – FALL 2024  
Sprint Plan 1 - Contribution Log  
Marcelo Pedroza Hernandez (40200901)

Date	Duration (hours)	Description	Difficulty
09/10/2024	0.3	Task.1 Updated the README to include the project's details, summarized.	Low
09/15/2024	0.25	Task. 2 Chose the easiest console base for the entire project. Firebase provides a good and free Authentication and database management system.	Medium
09/16/2024	3	Task.7 Integrated Firebase (the backend) into the frontend of the app. Configured all of our Firebase modules.	High
09/17/2024	3	US.12 The user first tried to log in with a bad password, which the authentication rejected, and once again with the correct password, in which the authentication then accepted	High
09/18/2024	0.75	Task.14 Made sure the "logout" and "login" buttons are shown at the appropriate pages. Also changed to "Sign In" and "Sign Out".	Medium
09/21/2024	5	Task.15 A bad commit broke the code. Refactored the code and reviewed about 1,000 lines of code from dev team member's commit.	High
09/22/2024	1	US.17 Implemented a function that prevents students signing up as instructors. Instructors now need a special key to register.	Medium
09/25/2024	3	Task.18 Assuming an instructor has assigned them to a team, students can now view their group name.	High
09/26/2024	4	Task.19 Instructors should be able to form, remove, delete, edit and view student groups from their perspective. They can also confirm/approve once a group is full/completed	High
09/27/2024	2	US.21 Students can now see the full list of team members & emails once they've logged into their account on the application (if they have been assigned into a team).	High
TOTAL	22.3
