

Task	User story/Task title	Story points	Due date	Associated tasks/Task description.	Priority (low, medium, high)	Risk (low, medium, high) w/ b	Responsible
1	Format the data on the UI	5	10/11/2024	The data, including the calculated grades and averages as well as the potential comments left by users shall be properly organized in a clean and orderly fashion for the instructor to view from their perspective	Medium	Medium / The formatting of the data won't affect the runtime or execution of the application and is a little UI change	Yash, Fabio
2	Create two separate instructor dashboards	8	10/11/2024	An instructor shall see a detailed dashboard of his class, including 2 new specific ways/formats to see the results of his class: either a detailed view of his class, or a summary view of his class	High	High / If done incorrectly, the instructor perspective will not be able to clearly view his class, as well as the application failing to meet an important system requirement	Yash, Fabio
3	UserStory*: User logged in as an instructor. User was able to select their class for viewing. User saw the data for their class. User noted that the data shown was too "disorderly" and "messy".	8	10/11/2024	An instructor shall see a table of all his students with their specific information, including student ID, first and last name, team, individual evaluation points, the calculated average, as well as any comments left by feedback users	Medium	Medium / Clarity for the instructor will not severely impact the application	Chris, Yash, Fabio
4	Refactor the database	13	10/11/2024	The database shall retrieve all data and information based off student UID and team ID, instead of students' emails	High	High / Needs to be implemented for the new instructor dashboard features	Marcelo
5	UserStory*: User logged in as a student. User saw their own grades that they received from the peer evaluation. User did not agree with the grade they received and wanted to challenge/contest the grade, but had to email the instructor.	13	10/11/2024	A new contest feature shall be implemented from the student's perspective, where a student can contest a certain grade that they do not agree on, which will send a notification to the associated instructor of that student	High	High / A highly anticipated new required feature that will improve the quality of life for users	Marcelo, Fabio, Evelynne
6	User story*: User logged in as an instructor. User saw the grades and averages by the students. User wanted a better visualisation of their class' grades	13	10/11/2024	The calculated data, such as the averages, shall also be displayed in graphical format for the instructors to see	Medium	Medium / Will not affect the code, but is another required system enhancement that needs to be implemented	Marcelo, Fabio, Yash, Chris
7	Organize and upload all documents	2	10/11/2024	All necessary documents, such as the Sprint Plan and the Meeting minutes, shall be clean, organized, and properly uploaded to the repository before the deadline	High	Low / No real danger to the code or the application	Chris

8	Issue and user story translation	5	10/11/2024	The Sprint Plan in its entirety shall be properly translated into the GitHub repository as issues and user stories accordingly	High	High / If not done, the team will have no lead to follow and will be lost	Tristan
